

Case Study – Bryan’s Story

“I am much happier with my broadband service since switching to fibre, it is more consistent with no drop-outs and the installation was very simple”

Bryan Evans of Tarvin near Chester

Bryan Evans of Tarvin near Chester recently took advantage of the arrival of Superfast fibre broadband in his village and has seen his speed rise from around 5Mbps to over 35Mbps. Bryan is taking full advantage of his new service and enjoying the ability to Skype with friends and relatives, using TV catch-up services, following stock market trends and is a keen eBay user.

Bryan said: “The switch-over was much more straightforward than I had imagined; the engineer came on the day I arranged with my internet service provider and also gave me some helpful advice on how to get the best possible speed by simplifying the wiring in my home - I would now definitely recommend upgrading!”
