

## Case Study – Mike’s Story

“We’ve now gone from 5Mbps to 75Mbps, and the difference has been huge! Mike Gibbons – Sandymoor, Halton

Since its upgrade to fibre in October 2014, one of the first Sandymoor residents to upgrade to fibre has been Mike Gibbons; who is also the Managing Director of Definteco Ltd based in Runcorn who specialise in the design and project management of integrated technology solutions, including audio visual systems, security, and data networks, for installation onto super yachts worldwide. ([www.definteco.com](http://www.definteco.com))

Mike is now in the often common situation whereby his home speed is now faster than his office, so it will mean he can spend more time working from home and with his family. Mike takes up the story:

“With two teenage daughters we are heavy users of social media, streaming films and catch-up TV – and it’s all now happening instantly, whereas before fibre it was a slow and frustrating process keeping everyone online and entertained. For my business things are now much better too, I can upload and download large files and technical drawings, video conference with clients and as I travel a lot, my family can now keep in touch with me via video calls wherever I’m working.”
